

Eva Regelski

Cleveland, OH | evaregelski@gmail.com | evaregelski.figma.site | [LinkedIn](#)

PROFILE

UX designer specializing in complex, data-dense enterprise products for technical users in regulated domains. Owns the full arc from user research and workshop facilitation through design systems, high-fidelity prototypes, and UX QA — with a background in marketing analytics that brings a business and data perspective to product decisions. Technically fluent in HTML, CSS, and JavaScript, and experienced partnering closely with engineering to design within real delivery constraints.

PROFESSIONAL EXPERIENCE

Lead UX/UI Designer | Cyberstar Software Feb 2024 – Present

Sole designer for compliance software used by Department of Defense agencies to manage cybersecurity workforce qualification under the DoD Cyber Workforce Framework (DCWF 8140/8570).

- Leading the end-to-end redesign of the Management Dashboard — the primary tool compliance leaders use to monitor workforce readiness, identify unqualified personnel, and report to agency and CIO leadership.
- Runs user research with agency compliance leaders, combining interviews, contextual inquiry, support-ticket analysis, and usage analytics; research revealed the product's binary compliant/non-compliant model didn't match how managers triage, driving a rebuild around a multi-tier qualification taxonomy.
- Facilitates cross-functional design studios with executive, engineering, and customer success participants, using assumption mapping and an evidence-vs-importance matrix to prioritize a validated scope against a six-engineer delivery constraint.
- Tests low-fidelity design directions with customers before high-fidelity work, and traces each design decision back to specific research findings.
- Establishes design principles and a scalable design system and component library standardizing UI and brand consistency across the application.
- Designs to Section 508 accessibility standards, encoding status through labels and counts rather than color alone so distinctions hold for colorblind and screen reader users.
- Builds interactive prototypes in Figma and Claude Design that stakeholders and engineers can click through and inspect directly, reducing ambiguity at handoff.
- Conducts a comprehensive application audit, translating findings into a prioritized UX backlog for engineering; supports marketing for conferences, community outreach, and sales demos.

UX Designer | KeyBank Aug 2022 – Jan 2024

- Designed and launched 10+ end-to-end campaign journeys, leading research, strategy, UX flows, high-fidelity prototypes, and testing to deepen client relationships.
- Designed a Wealth Leadership Dashboard surfacing real-time segment performance data, enabling faster decision-making for KeyBank Wealth leadership.
- Led design and delivery of 5 new features and tools that streamlined workflows and improved satisfaction for customers and internal teams.
- Facilitated 5 cross-functional design-thinking workshops for product teams and interns, guiding teams from discovery through prioritized ideation.
- Conducted user interviews, surveys, usability testing, and competitive benchmarking, presenting data-driven insights and recommendations to stakeholders.

Lead UX Designer & Researcher | Mappa Apr 2022

- Planned and executed user research including competitive analysis and 10 user interviews, defining personas and core needs for a location-aware game.
- Led a collaborative design studio to create user flows, sketches, and wireframes for the first three days of gameplay.
- Built high-fidelity mobile and desktop prototypes in Figma and delivered design specifications for client handoff.

Digital Marketing Specialist | Kinnect Aug 2020 – Dec 2021

- Developed donor communication strategy and brand materials, contributing to \$55,000 in fundraising through insight-driven campaigns.
- Designed, launched, and monitored social media strategy across three platforms, analyzing performance data to grow followings by 200%.
- Led redesign and implementation of the company website to improve user experience and content management.

Marketing & Emerging Talent Network Associate | JumpStart Inc. May 2019 – Aug 2019

- Conducted and presented research to inform program strategy and youth outreach decisions for a nationally recognized nonprofit.
- Designed 15+ Excel tools to streamline employer and student data management, improving accuracy and team efficiency.
- Created 30+ marketing materials including flyers, graphics, and PR collateral, contributing to a 20% increase in program event attendance.

EDUCATION

B.S. Marketing Management | Case Western Reserve University Aug 2016 – Aug 2020

Minors: Computer Science, Studio Art

UX/UI Immersive | General Assembly Jan 2022 – Apr 2022

AREAS OF EXPERTISE

UX & Product: User research, usability testing, contextual inquiry, personas, information architecture, wireframing, prototyping, design systems, interaction design, UX QA, Section 508 accessibility

Research & Facilitation: Design studio facilitation, assumption mapping, feature prioritization, stakeholder workshops, competitive benchmarking, concept testing

Data & Analytics: Google Analytics, Tableau, Excel, Salesforce, dashboard design, data visualization

Design & Dev: Figma, Claude Design, Adobe Suite, Procreate, Canva, HTML, CSS, JavaScript, interactive React-based prototyping
